

DARKFIGHTER K9 VEST - DFK9

OFFERING UNRIVALED COVERAGE, MOBILITY, AND PROTECTION.

This DFK9 VEST was crafted with input from dozens of elite handlers and designed in-conjunction with top-tier K9 teams in law enforcement. Quick to put on, and scalable to meet mission threats, the DFK9 is designed to protect working dogs in high threat deployments. TACTICAL ARMOR FOR YOUR DOG

Engineered to provide maximum coverage in vital high-threat areas of the chest and neck, the DFK9 includes pivoting fasteners, structured ballistics, and a contoured profile allowing for maximum coverage without impeding the dog's ability to move, search, or bite.

Quick-release, pivoting buckles allow for the rapid attachment of the DFK9's included ballistic yoke to provide unprecedented protection when needed, but also allow the yoke to be easily removed for normal operations.

Stowable handles, concealed buckles, and a sleek profile prevent snags and hang ups, and makes it nearly impossible for a suspect to remove the armor during a bite.

Available in 3 sizes and designed for a perfect fit on any K9, with enough adjustability to maintain fit as the dog gains and loses day to day weight. Available in 3 colors.
