

## DARKFIGHTER POCKET K9 CAMERA

Ready in 5s

The DarkFighter Pocket K9 Camera is engineered to enhance situational awareness for K9 handlers, allowing them to maintain a clear visual connection with their canine companions in various environments. This all-in-one camera module can be mounted in seconds anywhere on a K9 vest using MOLLE or velcro attachment. Cable-free, this ultra-durable system is designed for harsh environments and built for easy installation and operation.

One of its standout features is the ability to transmit live video feeds seamlessly, ensuring that handlers receive real-time visuals even when positioned up to 490 ft (150 meters) away from the dog. This capability is crucial for tactical operations where maintaining a safe distance while monitoring the K9's activities can be essential. This K9 camera was designed with a primary goal: to create a true all-in-one system, with no cables or secondary components, in order to maximize durability and longevity during both training and operational missions. The camera integrates into your harness in seconds—no tools or special equipment required. The system is easy to maintain and the antenna can be replaced in seconds.

The tactical monitor allows you to keep an eye on the progress of operations while maintaining control of your equipment. In an emergency, there's no need to drop the screen to take hold of your weapon or your dog. This tactical monitor can be used by other team members to follow the situation in real time. Small enough to fit in a Cargo Pouch.

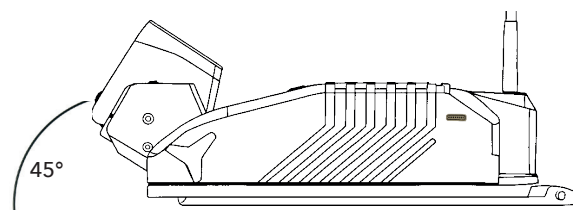

<b>Content Kit</b>	Pocket K9 Camera, Monitor, charger
<b>Material</b>	High impact resistant polymer injected / aluminium
<b>Power Supply</b>	2-hour autonomy, USB-C connector for charging
<b>Temperatures</b>	Temperatures -30°C to +60°C (-22°F to +140°F)
<b>Environment</b>	IP66 (designed in accordance with MIL-STD)
<b>Optonics</b>	Day/Night camera with a 120° angle of view, Adjustable camera module from 0 to 45 degrees IR + Visible illumination
<b>Range</b>	150 meters LOS, NLOS dependant
<b>Recording</b>	Recording on a SD card
<b>Physical</b>	163 x 52 x 43 mm / , weight 260gr /
